About Galatea Technologies

Through their automated solutions, Galatea Technologies, based in Calgary, AB, Canada, serves the global energy industry by improving waste management efficiency, financial performance, and social reputation. Their technology platform digitalizes, optimizes, and automates transportation workflows, equipping businesses with the tools needed to enhance operational and environmental performance.

“

The Reporting Hub makes it easy for us to provide our customers with Power BI reporting in a way that aligns with our corporate identity and existing technologies. Deploying and managing the Reporting Hub is simple doesn't require you to be a tech expert. It has given us a competitive advantage by enabling us to deliver a modern & secure self-serve reporting portal for our customers.

Challenges

There is inefficient customer access to Power BI reports.

Custom solution development is an overwhelming process.

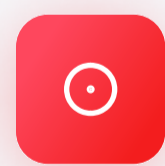

There is a need for custom domain, theming, and branding.

The time-to-market and technical complexity is slowing down business.

There are too many high costs involved.

We need more focus on core business.

The Reporting Hub Solutions

The Reporting Hub is a seamless and secure system for unlimited users to share Power BI reports without requiring individual user-based licenses.

The no-code, plug 'n' play solution can be easily deployed as a web app from your own Azure environment in less than 20 minutes and allows you to manage and share Power BI content without any development.

The Report Hub is a white-labeled SaaS solution that allows you to create a branded look and feel for your internal and external purposes – that is, your own branding, and even your clients' branding!

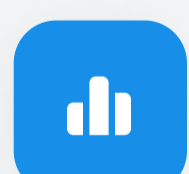

Our solution minimizes the time-to-market, and technical complexity of implementing Power BI Embedded.

The cost of deploying The Reporting Hub is very manageable and highly palatable, especially if compared to developing a custom solution for Power BI Embedded.

The Reporting Hub is no-code and plug "n" play so there are no distractions from your core business.

Speed, Cost-Efficiency, and Focus

Finding a straightforward way for customers to access reports was challenging without a custom solution. The Reporting Hub simplified everything—reducing time-to-market, cutting costs, and providing excellent support along the way. Now, Galatea can focus on core business priorities, free from managing a complex reporting platform.
