

The Reporting Hub

A turn-key custom-branded platform for efficient Power BI delivery using embedded technology.

Simplify Power BI Delivery with Your Own White Label Platform

The Reporting Hub is a powerful web-based business intelligence solution that seamlessly integrates with Power BI Embedded.

- ✓ Share with unlimited users
- ✓ Fully customizable
- ✓ No coding
- ✓ Deploys directly to your Azure environment

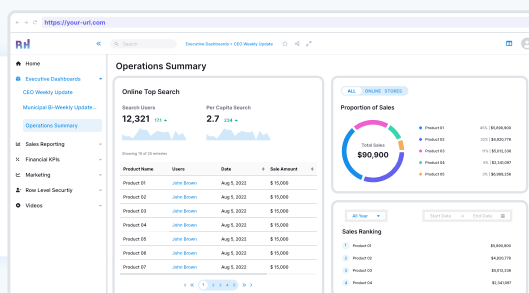

Why Choose The Reporting Hub?

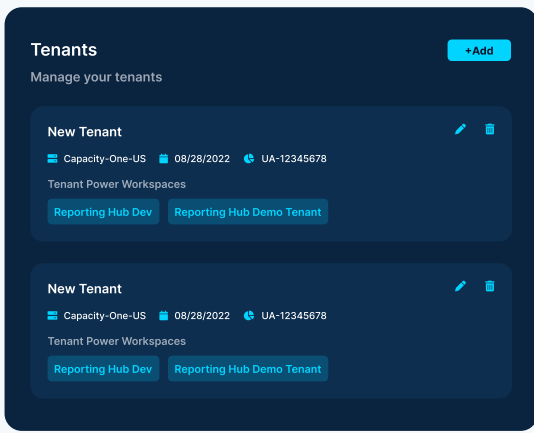

- 
No Additional Power BI Licenses Required
 Provide unlimited access to Power BI reports with flexible authentication and permissions management.
- 
Simplify Power BI Embedded Implementation
 Simplify Power BI embedded solutions implementation, removing complexities and front-end code development needs.
- 
Enhanced Data Access & Permissions
 Enhance user experience with custom branding in your portal and flexible authentication and permissions management.
- 
Flexible Integrations
 Integrate seamlessly as a standalone or with existing systems, ensuring compatibility and maximizing functionality.

Is The Reporting Hub Right for You?

Analytics-as-a-Service

The Reporting Hub allows you to effortlessly deliver Analytics-as-a-Service to your customers without the need for developers.

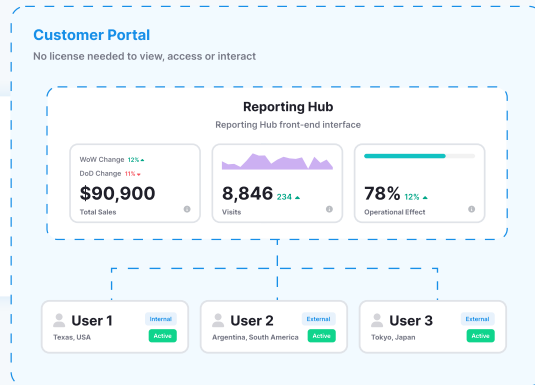

Unlimited User Deployment

You can share Power BI Reports with unlimited users, both internal and external, at no extra cost.

Secure Customer Portal

The Reporting Hub enables you to establish a secure portal for clients to access branded Power BI Reports securely.

Own Your Power BI Delivery

Increased Accessibility of Insights

Easily share business intelligence insights with a wider audience, including customers and partners, by embedding them directly into the applications and portals they already use.

Cost-Effective Solutions

Enjoy cost-reductions: you pay only for what you use, making it a more economical option than licensing individual users.

Data-Driven Decision Making

Enable dynamic, interactive data insights that empower users to make informed decisions based on the latest data trends and patterns.

Secure Data Handling

Leverage the robust security features of Azure and Power BI Embedded to ensure that your data is handled securely, maintaining compliance and safeguarding sensitive information from potential threats.

Scalability

Experience exceptional scalability with our cloud-based service, making it suitable for both small applications and large-scale enterprise solutions, ensuring that your business can grow seamlessly.

Seamless Integration

Effortlessly embed Power BI reports and dashboards into web applications, mobile apps, and custom software, ensuring a consistent and native user experience.
